Re: Notice of Ex Parte Presentation
In the Matter of Review of Section 251 Unbundling Obligations of Incumbent
Local Exchange Carriers and Implementation of the Local Competition Provisions
in the Local Telecommunications Act of 1996, CC Docket Nos. 01-338; 96-98;
98-147

In the Matter of Appropriate Framework for Broadband Access to the Internet
Over Wireline Facilities, CC Docket Nos. 02-33; 95-20; 98-10

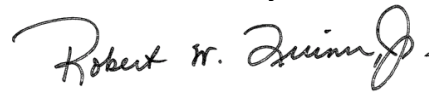

Dear Ms. Salas,

On Monday February 3, 2003, I spoke on the telephone to Lisa Zaina, Commissioner Adelstein's Senior Legal Adviser, to discuss issues related to the aforementioned proceedings. During the course of those discussions, I explained AT&T's position on the necessity of requiring the unbundling of switching until the significant economic impairments that AT&T has identified in the record of the Triennial Review are addressed and eliminated. The process of identifying those impairments and whether they have been removed can only be conducted on a market-by-market basis and cannot be determined in a national proceeding. Rather, state commissions must be left with the authority to conduct that granular analysis based upon local facts and conditions. If the Commission here adopts presumptions with respect to any network element, the states must be permitted, based on evidence adduced in a state proceeding, to issue contrary findings and determine a state-specific list of UNEs without having to resort back to the Commission for authority. I stressed the importance of maintaining UNE-P to competition in local as well as long distance consumer markets.

In any event, I stated that the Commission here should find that the record requires on a nationwide basis that carriers are impaired without access to all UNEs previously identified without limitations such as the ones that exist in the switching and combination areas. I also stated that pricing of those UNEs should continue to be done by the states. In addition, I underscored the importance of preserving CLEC access to ILEC loop facilities, and identified operational and cost barriers to competition that would result if CLECs were relegated to copper facilities as ILECs introduce additional fiber into existing loop plant. Specifically, we discussed the possibility of service disruption if the ILECs were permitted to “migrate” CLEC voice or data customers from fiber to copper facilities at their discretion. I finally emphasized the importance of maintaining an effective path to broadband service for competitive carriers with specific enforcement mechanisms to ensure that ILECs have the incentive to provide broadband access in the most efficient manner possible.

The positions expressed in the meeting for each of these areas were consistent with those contained in the Comments, Reply Comments and ex parte filings previously made in the aforementioned dockets. One electronic copy of this Notice is being submitted for each of the referenced proceedings in accordance with the Commission’s rules.

Sincerely,

A handwritten signature in black ink, reading "Robert W. Quinn". The signature is written in a cursive, flowing style with a large, stylized "Q" at the end.

cc: Lisa Zaina
